

## **Publication process on the Inside Information Website**

After issuing the rights for publication, two new menu items will be available for logged in Users.

- „New Publication” – where new information can be uploaded,
- and „Own News” – where all the news published by the company appear and can be edited.

### **Add news**

During the publication process Users fill out a form similar to the ones applied during the registration process. The first step is to choose the type of inside information from the upcoming options.

After choosing the type of inside information, in case of basic data supply market participants are obliged to provide the following information. The grey fields are filled automatically. Free text must be written in both English and Hungarian.

In case of extended data supply, market participants are obliged to provide the requested data.

In both cases of data supply as the last step the Rules of Publication need to be accepted after which the publication is completed.

### **Own News**

By clicking on „Own News” on the right corner Users have the opportunity to choose between these items:

- delete news
- edit news

In case of deleting news a red publicational box appears (without text), furthermore the Hungarian Energy and Public Utility Authority receives an automatic message about the cancellation/deletion.

In case of editing news the same image will appear as during the uploading process, where Users can edit the data of the publication. After the modification also the previous publications will appear furthermore at the new publication by clicking on the item “History” the related publications can be seen too.
